

the.difficult airwaycourse™ EMS

theairwaysite.com

The Definitive EMS Airway Course

■ Learn the full range of airway management

techniques - including use of extraglottic devices, medication-assisted intubation, video laryngoscopy & other advanced imaging devices, and cricothyrotomy.

■ Work with experienced faculty who know the unique challenges facing EMS providers.

■ Use all of the airway devices in small group sessions.

■ Practice decision making and airway techniques in Code Airway™ stations.

■ Face the most challenging patient scenarios in a no-risk environment. These include elevated ICP, pulmonary edema, status asthmaticus, foreign body in the airway, direct airway trauma, multiple trauma with shock, and many more.

■ Meet your continuing education requirements.

This two-day course is approved by CAPCE and ASTNA.

■ Receive the definitive airway textbook, *The Walls Manual of Emergency Airway Management* by Calvin A. Brown, MD John C. Sakles, MD and Nathan W. Mick, MD
